SPECIAL Overview

Aims

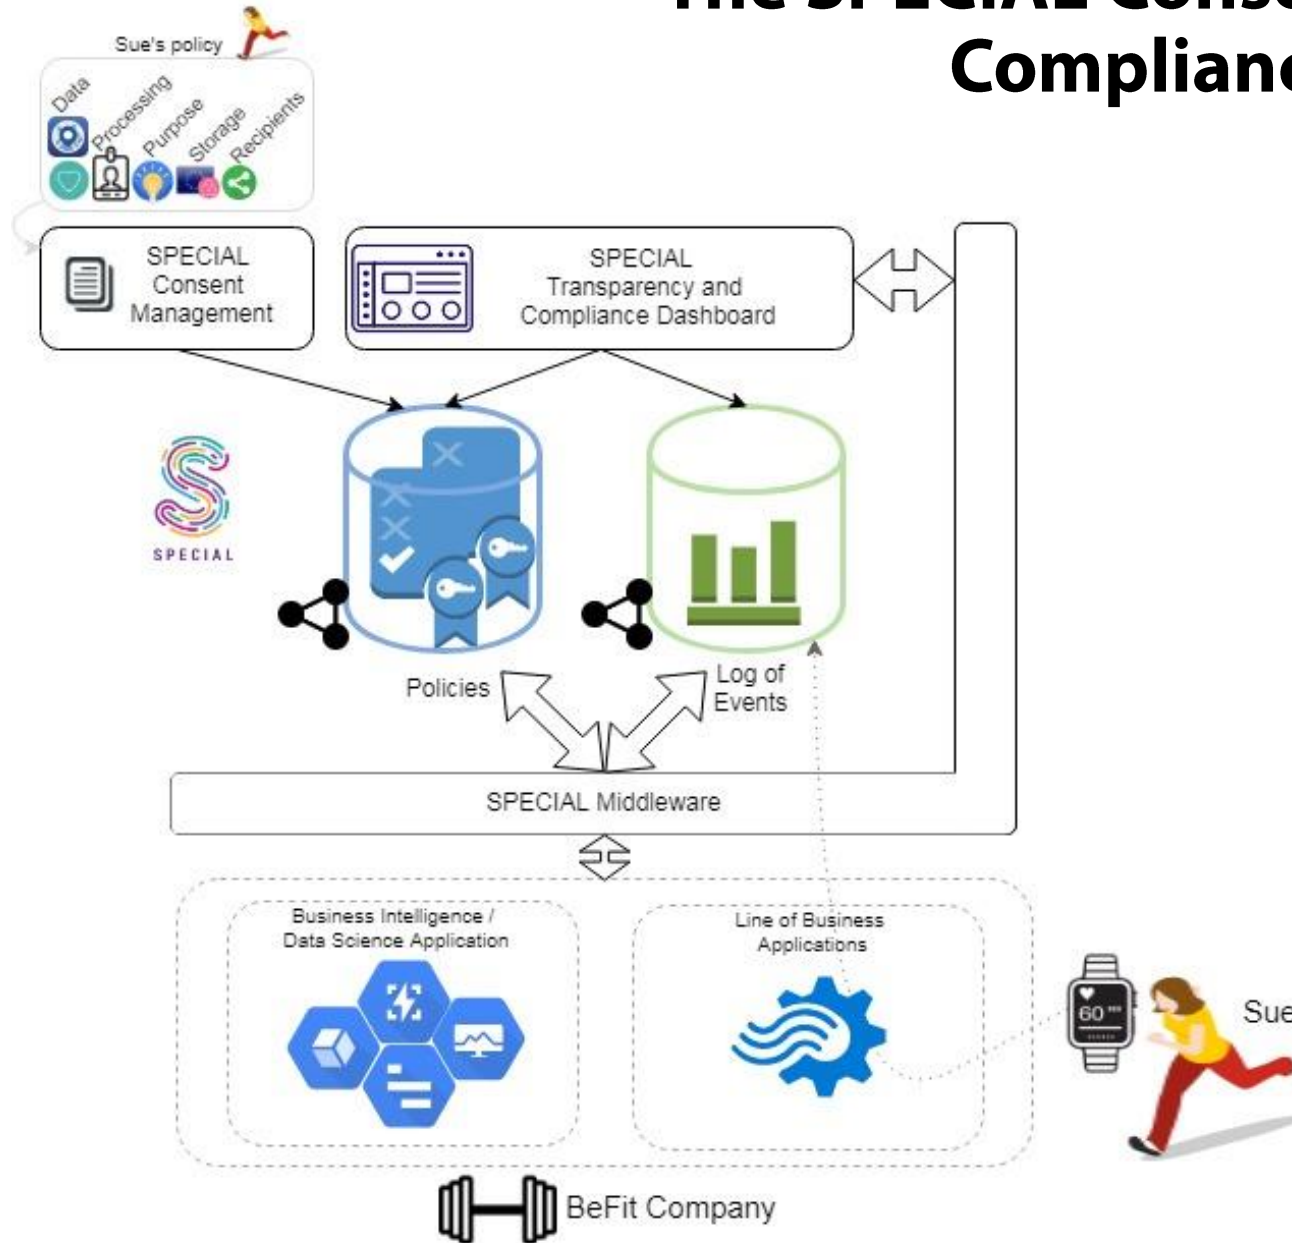

SPECIAL Overview

Objectives

- Policy management framework
 - ❖ Gives **users control** of their personal data
 - ❖ Represents **access/usage policies** and **legislative requirements** in a **machine readable format**
- **Transparency and compliance framework**
 - ❖ Provides information on how data is **processed** and with whom it is **shared**
 - ❖ Allows data subjects to take **corrective action**
- Scalable policy-aware Linked Data architecture
 - ❖ Build on top of the Big Data Europe (BDE) platform **scalability and elasticity mechanisms**
 - ❖ Extended BDE with **robust policy, transparency** and **compliance protocols**

The SPECIAL Consent, Transparency and Compliance framework

Privacy policy formalization

- Record **usage policies**
- SPECIAL is releasing the SPECIAL policy language
 - Based on OWL EL

“**Heart rate** and **location data** are **collected** and **analysed** to create a **user profile** for the purpose of issuing **recommendations**. Profiles are stored **indefinitely** in the **EU** by the data controller and released to **third parties**.”

Transparency framework

- Record **data processing and sharing events**
- We have developed a vocabulary for the logs (SPLOG)
 - <http://purl.org/specialprivacy/splog>
- We have a running prototype (ESWC 2018)

Discussion

- lack of specific and standard **vocabularies** for representing **privacy-related events**
- It should be possible to describe the event content at different **granularities**
 - from a simple **taxonomy** (stating the type of data, processing, etc.), to the most fine-grained description of the **actual data** associated to the event;
- **Interoperability/standard APIs**
 - different systems within a company and/or different companies
